Leveraging the SeaBlaze Quattro technology, the Zambezi Quattro is suitable for pontoon boats, aluminum skiffs and floating docks. The Zambezi Quattro is completely surface mountable and requires no wiring through-hull holes. The housing is constructed of carefully formulated bronze alloy with a designed underwater service life of more than 50 years and the self-isolating back spacer separates the housing from metallic surfaces to prevent galvanic corrosion. The circuitry is completely self-contained and tested to rigorous military standards for EMI, transient voltages, temperature extremes, and mechanical shock and vibration. Exclusive thermal foldback technology ensures the light can operate above water indefinitely without damage.
